

GATECRASHER1

Compact Wireless Smart Speaker System

High-Performance 2.1 Stereo Sound at Your Command

Makassar Ebony

Piano Black

Gatecrasher 1 brings the world of digital audio into your home with easy, intuitive operation and superb Atlantic Technology sound that is sure to satisfy even the most discerning listener.

Play All Your Favorite Music

This compact powerful package features native music streaming capability from leading subscription services Spotify®, Tidal, Deezer and Qobuz. Plus, vTuner brings you tens of thousands of free internet radio stations from hundreds of countries world-wide. High-quality Bluetooth® 4.2 with aptX™ streams personal music from your mobile devices, and DLNA® 1.5 dual-band Wi-Fi™ technology streams music from your network connected PC, Mac or NAS. You can also connect a CD player, TV, Amazon Echo, Google Home or other device to Gatecrasher's Auxiliary input. The unit's special Priority Auto-Sensing™ feature automatically wakes Gatecrasher up from standby mode and switches to play the connected device on demand.

Optional Voice Control

Connect your Amazon Alexa or Google Home device directly to Gatecrasher's Aux-input and in doing so, you can enjoy the convenience of your smart speaker with Gatecrasher's Hi-Fi stereo sound. In late summer 2018, Gatecrasher1 will add "*Works with Amazon Alexa*" capability by way of a free, automatic update, linking Gatecrasher to any Amazon Alexa-enabled device. Alexa control of Gatecrasher will enable hands-free *Skills* including volume, pause, track forward/back, source select and more through your home Wi-Fi network.

Simple, Flexible Operation

For ease of use, Gatecrasher's top-panel boasts an intuitive color-coded, backlit control pad with programmable presets. The unit can also be controlled via the free downloadable Atlantic Technology Gatecrasher App for iOS or Android™ devices. Plus Spotify subscribers can also control Gatecrasher by the Spotify Connect App.

For big sound in large rooms, Gatecrasher can be easily configured to operate as a stereo pair with a second Gatecrasher unit. And if you want whole-house-audio, multiple Gatecrashers may be used throughout your home, controlled individually or placed into groups for an incredibly flexible multi-room network.

Performance and Design

Gatecrasher contains a precisely-tuned 2.1 speaker system with a separate woofer and tweeter for each channel, combined with a built-in subwoofer and down-firing Auxiliary Bass Radiator for dynamic, wide-range sound that defies its size. A switchable Wide Expansion mode enhances the spatial imaging of the stereo speakers within the single cabinet. Gatecrasher 1 is constructed of solid-MDF wood as used in modern premium hi-fi speakers with two high-gloss furniture-grade finishes available: Piano Black or Makassar Ebony. With Gatecrasher the world of music is at your command.
